Gold Seal Certification
by Water Quality Association

Bringing quality products to market is a priority for any manufacturer, especially when it comes to water safety. Water Quality Association (WQA) ensures that the products meet or exceed the standard/protocol they are certified to.

What is the NSF/ANSI 401 Standard:

NSF/ANSI 401 establishes minimum requirements for materials, design and construction and performance of drinking water treatment systems that are designed to reduce specific emerging compounds/incidental contaminants in public or private water supplies, such as pharmaceutical, personal care products, and endocrine disrupting compounds.

Examples of contaminant reduction claims that can be made:

• Phenytoin • Trimethoprim
• Atenolol • Ibuprofen
• Carbamazepine • Naproxen
• TCEP • Estrone
• TCPP • Bisphenol A (BPA)
• DEET • Linuron
• Metolachlor • Nonyl phenol

Why WQA Gold Seal Certification?

Quick Turnaround - Products are tested in a state-of-the-art laboratory to ensure that they are certified on time and make it to market on schedule.

Expert Service - WQA-Certified Water Specialists will guide you through the testing and certification. One-on-one communications let clients know that they are partners in the process.

Superior Reputation - For over 50 years, WQA has been recognized as an industry leader for their certification and promotion of water quality and safety. WQA is accredited by the American National Standards Institute (ANSI) and the Standards Council of Canada (SCC) to perform NSF/ANSI 42 Standard product certification.
