Bringing quality products to market is a priority for any manufacturer, especially when it comes to water safety. Water Quality Association (WQA) ensures that the formulation used in those products meet or exceed the NSF/ANSI 60 Standard through the Gold Seal Certification Process.

**What is the NSF/ANSI 60 Standard?**

This standard establishes minimum health effects requirements for the chemicals, the chemical contaminants and the related impurities that are directly added to drinking water from drinking water treatment chemicals.

**What does the NSF/ANSI Standard 60 cover?**

- Coagulation and flocculation chemicals
- Corrosion and scale control chemicals
- Disinfection and oxidation chemicals
- pH adjustment
- Well drilling chemicals
- Softening, precipitation and sequestering chemicals
- Specialty chemicals

**Why WQA Gold Seal Certification?**

**Quick Turnaround** - Products are tested in a state-of-the-art laboratory to ensure that they are certified on time and make it to market on schedule.

**Expert Service** - WQA-Certified Water Specialists will guide you through the testing and certification. One-on-one communications let clients know that they are partners in the process.

**Superior Reputation** - For over 50 years, WQA has been recognized as an industry leader for their certification and promotion of water quality and safety. WQA is accredited by the American National Standards Institute (ANSI) and the Standards Council of Canada (SCC) to perform product certification to perform NSF/ANSI 60 Standard product certification.
